

Your operation. One clear system.

Opliora connects engineering, production, materials, quality and people while the operational database remains inside the customer-controlled environment.

Connected manufacturing flow

Orders, revisions, material events, work progress and quality evidence share one traceable history.

Customer-controlled boundary

Docker-ready application, PostgreSQL, identity, backups and release timing under agreed customer ownership.

Focused role experiences

Managers, planners, operators, quality and purchasing see the context and actions relevant to their work.

Pilot before expansion

Start with one high-friction workflow, agree the baseline, validate outcomes and expand deliberately.

A practical starting point

CORE	PLANT	ENTERPRISE
Up to 15 users Focused workflows From EUR 390/month	Up to 60 users Connected operations From EUR 890/month	Multiple plants SSO and scoped integrations Custom

Live demo: [demo / demo](#) | hello@opliora.ee | www.nefab.uxui.ee

Prices exclude VAT. Implementation, migration, integrations and contractual service commitments are scoped separately. Demo figures are sample data, not customer claims.
